Why Choose PLTW Biomedical

Directed for students who have an interest in the medical field, the Project Lead the Way Biomedical Program is a 4 year sequence of courses designed to promote solving real-world problems and look into local and global health challenges, all with hands-on labs that mimic what medical professionals do. Applications to the program are taken upon entry the 9th grade year, for upper classmen, it can serve as an elective if spots are available.

Career Pathway Learning

01 Hands-On/Real-World Learning

Students gain practical experience through engaging, career-focused projects that connect classroom learning to real-world applications.

02 Career Exploration and Preparation

Students discover their interests, develop valuable skills, and explore potential career pathways while still in high school.

03 Skills for College and the Workforce

Students build critical thinking, problem-solving, collaboration, and technical skills that prepare them for success after graduation.

04 Learning with Purpose

Students connect their God-given talents and interests to meaningful work, developing a sense of vocation and purpose while living out Bishop Dwenger's Catholic mission.

Why Choose Construction

Choose Construction in Bishop Dwenger's Career Academy to turn your ideas into something you can build with your own hands. Through hands-on projects, you'll develop practical skills in building, problem-solving, teamwork, and the use of tools and materials. Explore a career field that offers opportunities to create, build, and make a lasting impact in your community while preparing for future education, training, or a career in the skilled trades.
